March 14, 2018

Subject: Recognition of Academic Contribution — Chess, Cognitive Thinking, and IT Education

To Whom It May Concern,

This letter is issued by Odlar Yurdu University to formally recognize **Mr. Movlan Aliyev** for his academic presentation delivered on **December 3, 2017** at the School of Information Technology and Applied Sciences in Baku, Azerbaijan.

Mr. Aliyev presented original research examining how chess strengthens cognitive thinking, STEM reasoning, information technology practice, and formal logic within higher education. His session established clear connections between strategic chess play and the analytical skills required in software development, structured problem-solving, and technology-oriented leadership.

Attending faculty and students noted the clarity of his arguments, the quality of his practical examples, and the interdisciplinary value of his approach — bridging game theory, cognitive science, and applied computer science in a manner accessible to both undergraduate and postgraduate audiences.

The university appreciates Mr. Aliyev's professional contribution and welcomes continued collaboration in academic seminars, joint research activities, and educational programs integrating chess methodology with STEM and IT curricula.

Respectfully,

Odlar Yurdu University
