Re: Immigration Support Letter — Mr. Movlan Aliyev, Senior Solutions Architect

To Whom It May Concern:

I am writing this letter in my capacity as **Manager, IT Dedicated Private Wealth at William Blair & Company, L.L.C.**, in strong and unequivocal support of Mr. Movlan Aliyev and his petition for immigration classification. I have directly supervised Mr. Aliyev throughout his tenure at William Blair, and I can confirm that he is a critical and irreplaceable member of our technology organization whose continued employment is essential to the firm's operations and strategic objectives.

Background and Hiring

Mr. Aliyev initially joined William Blair as a contract Senior Solutions Architect. Within a short period, his exceptional technical capabilities, ownership of complex deliverables, and measurable impact on enterprise projects led us to convert him to a full-time permanent position — a decision that required approval from senior leadership and reflected the extraordinary value he brought from his first day.

His current total annual compensation, including base salary and performance bonuses, exceeds \$150,000, placing him among the highest compensated individual contributors in our technology division.

Role and Scope of Responsibilities

As Senior Solutions Architect, Mr. Aliyev is responsible for designing, building, and maintaining enterprise-scale solutions across the Microsoft technology ecosystem at William Blair. His work includes:

- **Microsoft Power Platform** — Architecting and deploying Power Apps, Power Automate, and Power Pages solutions that automate critical workflows across finance, compliance, and operations.
- **Power BI & Analytics** — Designing firm-wide data models, executive dashboards, and self-service analytics environments supporting hundreds of users and informing investment decisions.
- **Azure & Cloud Infrastructure** — Designing solutions for data pipelines, identity management, and hybrid cloud integrations.
- **AI & Intelligent Automation** — Leading development of AI agents, Copilot integrations, and machine learning-driven automation initiatives.
- **SQL Server & SSMS** — Overseeing database architecture, query optimization, and governance for mission-critical financial systems.

Critical and Irreplaceable Contribution

Mr. Aliyev's departure would cause significant and immediate disruption to William Blair's technology operations. He is the sole architect and primary knowledge holder for multiple production systems processing time-sensitive financial data daily. These systems have no secondary owner, and their complexity would require **12 to 18 months** of transition time — if a comparable replacement could be identified.

In my 15+ years of managing technology professionals, I have rarely encountered an individual with Mr. Aliyev's unique combination of breadth in Microsoft technologies and depth in architectural expertise.

Significant Projects and Impact

Since joining William Blair, Mr. Aliyev has delivered several high-impact initiatives, including:

- Designed and deployed an enterprise automation framework using Power Automate and AI Builder, reducing manual processing time by over **40%**.
- Architected a firm-wide Power BI analytics platform, replacing legacy reporting tools and improving accuracy and delivery speed.
- Led the firm's first AI agent deployment using Microsoft Copilot Studio and Azure OpenAI.
- Re-architected SharePoint governance across the firm, establishing widely adopted standards.
- Built a real-time integration layer connecting on-premises SQL Server systems with Azure services for trading and risk platforms.

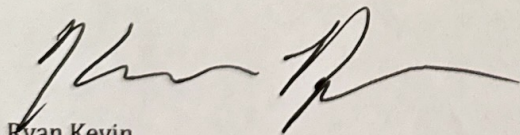

Professional Character and Leadership

Beyond technical excellence, Mr. Aliyev demonstrates outstanding leadership, communication, and collaboration. He mentors junior engineers, advises senior leadership on architecture decisions, and consistently delivers high-quality outcomes under tight timelines. His work ethic, integrity, and dedication to William Blair's mission are exemplary.

Conclusion

It is my strong professional opinion that Mr. Movlan Aliyev possesses extraordinary ability in his field and is indispensable to William Blair & Company. His loss would impact on our firm's technology capabilities, ongoing initiatives, and long-term strategy. I respectfully urge the reviewing authority to give his petition the most favorable consideration. I am available to provide any additional information or clarification as needed.

Sincerely,

Ryan Kevin
